

ICHS

WELCOME

International Clinical Hyperthermia Society

Dear Colleagues, Dear Members of ICHS, Dear Oncotherm-users,

Hyperthermia started to be an integrative part of the onco-therapies. Our Society is one of the oldest in this field. ICHS from its establishing represented the best traditions of the oncological hyperthermia, uniting the best national and international efforts to accept widely this complementary treatment.

Like in most other areas of life international communication is getting more and more important in medicine.

Let us exchange our experiences, get to know new approaches of hyperthermia in oncology and discuss seriously, openly new ideas. Our Society preferred the direct debates, protected the explicit and frank opinions for medical approaches for building up a better, safer and successful oncology treatments. Our main concern is to help the suffering patients by longer survival and high quality of life. I invite you to our conference to go further for our traditions and strengthen hyperthermia as a stable weaponry in the war of cancer!

Yours:

Prof. Dr. Szasz Andras
